On Demand Tutor in Your Classroom

Directions: Setup a station in your classroom with CHATGPT window open.
Log into the computer using Username: .\weclient Password: weclient
Give your classroom tutor a name Mine is named "Einstein"
If you are busy working with other students, direct your students to use "Einstein".

Example:
Prompt: 6th graders will ask you questions about how to solve a math problem. After students type in their questions, show them how to solve the equation without giving the answer. Give them a similar problem to solve on their own.

Students Question: How do I find 33% of 120?

CHATGPT Response:

To find 33% of 120, you can follow these steps:

Step 1: Convert the percentage to a decimal by dividing it by 100. So, 33% becomes 0.33.

Step 2: Multiply the decimal by the number you want to find the percentage of. In this case, multiply 0.33 by 120.

Now, go ahead and do the calculations. Once you have the answer, I'll provide you with a similar problem for you to solve on your own!

Students Answer: 39.6
Great job! You got the correct answer, which is 39.6.

Now, let's try a similar problem:

What is 25% of 80? Follow the same steps as before to find the solution. Once you have your answer, feel free to share it with me!
Students Answer: 20

CHATGPT Response:
Well done! You're absolutely right. 25% of 80 is indeed 20.

You've got the hang of it! If you have any more math questions or if you'd like to tackle another problem, just let me know. I'm here to help!
